CryptoCurrency

10 years ago, few people had heard of cryptocurrency...

Heck, the first bitcoin wasn't minted until January 3, 2009.

What I find crazy is, the first decade of cryptocurrency started off as a fringe investment idea. Everyone, myself included, thought it was a joke, or a scam. Many people asked when this "thing" would collapse.

Oh how times have changed.

The price of Bitcoin is now regularly quoted along with the S&P 500 and the Dow Jones Industrial Average.

There are hedge funds trading crypto. There are ETFs holding crypto. There's a crypto futures market now...

And, there are even crypto focused brokerages and exchanges: Hello Coinbase, Robinhood, and about a dozen others!

What I'm saying is crypto is here to stay.

But the big question is what to buy...

Buy these 5 Crypto Coins Now

The first thing I'm going to say is watch your back.

The Crypto world is full of fraudsters. It's the wild wild west of trading.

The entire market is unregulated... and that means no-one is there to help or protect you if things go sideways.

The news is filled with people losing lots and lots of money in Crypto... And there's even more stories that go unreported.

The market is volatile. The Coins are complex.

So, Before you buy anything (even stuff I recommend) do your damn research. Make sure you understand what you're investing in and why!

Remember nobody will care for your money more than you...

Ok, one last disclaimer... (my lawyers require this) - I'm Biased. I OWN The five Crypto Coins I mention below. Yep, I bought them. I Own them. I make money if they go up. And I can sell them at any time without warning... or buy more!

Ok, now that you know how the table is set... lets get to my favorite coins...

5 Crypto Coins TO Buy Today.

Here we go...

Coin #1 - Bitcoin (BTC)

Bitcoin is the granddaddy of Crypto Coins. You can't build a portfolio without some of these coins.

Coin #2 - Ethereum (ETH)

Ethereum is the Queen of Crypto... as I write, the second largest coin by market cap, and used for a whole host of things - especially DeFi.

Coin #3 - Solana (SOL)

Another BIG coin out there in the world. This coin's claim to fame is it processes transactions quickly and cheaply - when compared to ETH.

Coin #4 - Polygon (MATIC)

This coin is tied to ETH, as a "side chain". There's a whole Network of people using this coin to create smart contracts.

Coin #5 - Uniswap (UNI)

UNI is another coin tied to ETH and used for smart contracts. It is one of the first movers in the DeFi space.

There you have it... 5 crypto coins to start buying today.

Are there others? Of course.

There are hundreds of crypto coins... and new ones are being created each day.

Dip your toe in the market. Buy a little here and there... and learn all about how the crypto markets work.

You won't be disappointed.
